WHITE Trucker Trip 1981

Gentlemen,

The whole Swiss-Group returned safely to Switzerland. The visit to your facilities on May 4th was one of the high-lights during our trip.

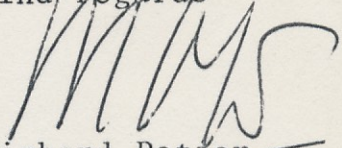

All our travelers were convinced about the big efforts to make such reliable engines. The final test every engine has to make impressed us all.

The separate Nashville programm for our wifes was a very good idea. As they told us, they had a lovely morning. Also the Indianapolis Motodrome and the museum were very informative and interesting.

The whole day was very well organized by your people. It was nice to visit your factory and we hope that this trip will help us to sell WHITE with CUMMINS engines in Switzerland.

Many thanks for all the work you did and we hope that once a day you can use the bernese flag for to welcome another group from here.

Kind regards

Richard Potjer
